

EnsembleClustering
::Matching::isProper

```
graph LR; A[EnsembleClustering::Matching::isProper] --> B[EnsembleClustering::Graph::numberOfNodes]; A --> C[EnsembleClustering::Graph::hasEdge];
```

The diagram illustrates a tree structure. A root node on the left, labeled 'EnsembleClustering::Matching::isProper', has two outgoing arrows pointing to two child nodes on the right. The top child node is labeled 'EnsembleClustering::Graph::numberOfNodes' and the bottom child node is labeled 'EnsembleClustering::Graph::hasEdge'.
