

NetworKit::TEST_F

```
graph LR; A[NetworKit::TEST_F] --> B[NetworKit::Graph::insertEdge]; A --> C[NetworKit::Graph::forNeighborsOf];
```

The diagram illustrates a call to the `NetworKit::TEST_F` function, which branches into two calls to methods of the `NetworKit::Graph` class: `insertEdge` and `forNeighborsOf`.

NetworKit::Graph::insertEdge

NetworKit::Graph::forNeighborsOf
